

QueryBuilder avec Filtrage

php

 Copy code

```
public function getTicketPriceStatsByTheatrePlayQueryBuilder($id)
{
    return $this->createQueryBuilder('s')
        ->select('MIN(s.ticketPrice) AS minPrice',
            'MAX(s.ticketPrice) AS maxPrice',
            'AVG(s.ticketPrice) AS avgPrice')
        ->where('s.theatrePlay = :id')
        ->setParameter('id', $id)
        ->getQuery()
        ->getSingleResult();
}
```

Requêtes SQL avec Filtrage

DQL avec Filtrage

php

```
public function getTicketPriceStatsByTheatrePlayDQL($id)
{
    $entityManager = $this->getEntityManager();

    $query = $entityManager->createQuery(
        'SELECT MIN(s.ticketPrice) AS minPrice,
            MAX(s.ticketPrice) AS maxPrice,
            AVG(s.ticketPrice) AS avgPrice
        FROM App\Entity\Show s
        WHERE s.theatrePlay = :id'
    )->setParameter('id', $id);

    return $query->getSingleResult();
}
```
